

# Bauerschmidt Folien

## **YOUR SPECIALIST**

FOR DEVELOPMENT,  
PRODUCTION, PRINTING AND  
ASSEMBLY OF HIGH QUALITY  
FILM PACKAGING.

## WITH US, YOU CAN WRAP THINGS UP!

And you can take that literally. The Bauerschmidt Group offers you high-performance and competitively priced film products, which are developed, and produced on state-of-the-art equipment according to your individual needs.

We are characterized by the flexibility of a medium-sized family business. Combined with the experience of 50 qualified employees, many years of expertise in plastics manufacturing and an innovative variety of products, we are able to be close to our customers - understand and satisfy their needs.

For you, too, we will find the appropriate packaging solution.

### **Horst Bauerschmidt KG**

The Company Returns to Family Ownership In 1990.

From the very beginning, Horst Bauerschmidt KG has been conceived as a modern film manufacturer, offering its customers high-quality film products as modern flexible packaging solutions - from in-house converting of polyethylene films to innovative processing methods and material compositions.

### **Bauerschmidt Kunststoff GmbH**

In 1994, a second company, Bauerschmidt Kunststoff GmbH, was founded. Here we produce polyethylene films on high-tech extrusion lines, which are then converted into finished products of the highest quality on high-performance sealing machines. With inline and flexo printing machines, we are able to produce products of any size, from small to oversized.

**STEADY  
GROWTH IS  
OUR TRADEMARK**

# OUR PRODUCTION

FLEXIBLE, FROM SMALL BATCHES TO HIGH-VOLUME PRODUCTS.

## Extrusion

- Single-layer, Multi-layer, Birbalin, Bio, Recycling films
- In-House Recycling
- Efficient, sustainable production

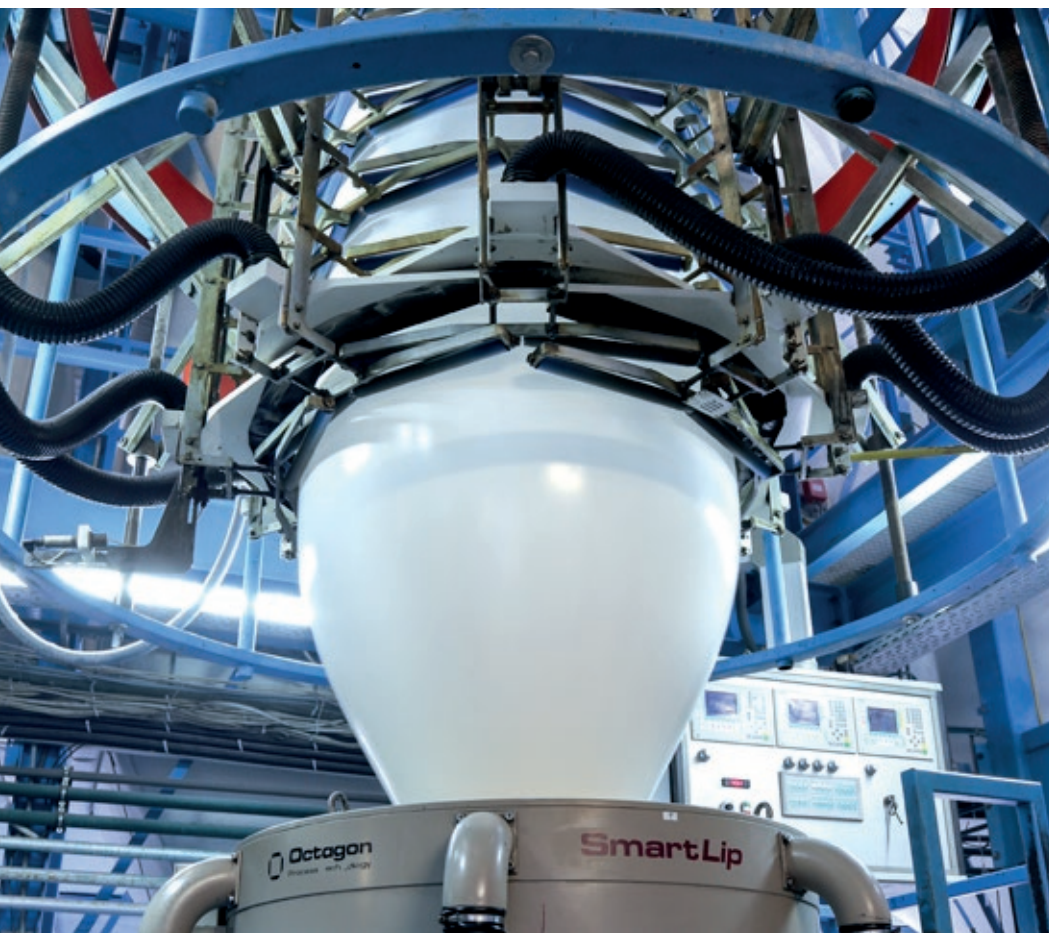

## Printing

- Inline printing up to 4 colors
- Flexographic up to 6 colors
- Printing width up to 2400 mm / printing repetition (up to 2300 mm)

## Assembly

- Sleeves, Bags, Sacks, Hoods, Custom film
- Special assembly
- Individual print finishing

## Industry

We apply our extensive experience for you.

## Pharmaceutical Industry

Reliable protection for sensitive content.

## Food Industry

Ensuring that all the freshness reaches the consumer.

# OUR FILM SPECTRUM

EVEN FOR UNCONVENTIONAL PACKAGING REQUESTS.

## PE-Film

The all-rounder among packaging films.

## COEX-Laminate Film

Composite material for specific properties.

## Birbalin<sup>®</sup>

PE-Folie

In-house development with thickness-reduced top quality.

## bioFolie

With this film we complete the biological cycle.

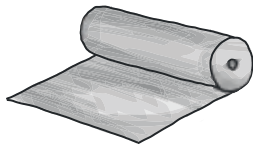

## Recycling-Material

Conserve resources with re-granulate.

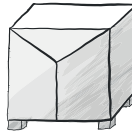

## OUR PRODUCT RANGE

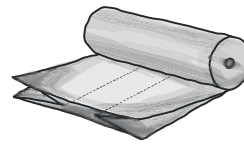

Bags and Sacks

Flat Film

Hoods

Tubular and  
Folded-Tubular Films

Customized Films

## CERTIFIED QUALITY

OUR STANDARD, ON WHICH WE CAN BE MEASURED.

Through a transparent and successfully certified quality management system, we are a reliable partner for customers and suppliers. The aim of quality assurance is to offer our customers modern, reliable, and reasonably priced products.

Flexibility, short delivery times and competent expert advice are a matter of course for us. It is the task of every employee to contribute to this with his or her work.

To ensure quality, the company works with uniform standards. We also monitor our production processes and products through regular inspections.

# EFFICIENCY AND SUSTAINABILITY

BECAUSE WE ARE COMMITTED TO OPERATING RESPONSIBLY.

## In-House Development of Innovative Materials

We are never satisfied with ourselves - in order for you to be satisfied with us. That's why we also explore extraordinary approaches. Biofilm manufacturing is one of them. Recyclable and biodegradable materials are the future in film production. Therefore, we continue to diligently develop innovative films.

## Consistent Use of Recycled Materials

We process production waste - and reintroduce it into the production cycle as secondary raw materials. In this way, we handle our resources efficiently and responsibly. We do this for the sake of the environment, for cost-conscious management, and in the interest of our customers.

## Thickness Reduced Film Production

With the Birbalin special quality, we reduce the film thickness by up to 50 % - while maintaining the same stability and strength. This saves valuable raw materials, energy, and CO<sub>2</sub> emissions, but also packaging and logistics costs. And you, the customer, also save, because a lower film thickness is reflected in a fair price.

## Effective Energy Savings in Production and Administration

To heat all buildings, we use the technological waste heat, benefit from free cooling of the system technology and have equipped the office and production areas with energy-efficient and long-lasting LED lighting. We cover 10% of our energy needs in a climate-neutral way by generating our own electricity with our photovoltaic system.

For the environment

## BIO FILM

WITH THIS FILM WE COMPLETE  
THE BIOLOGICAL CYCLE.
